

AGN. NO. _____

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

JULY 21, 2009

Water agencies across Southern California are facing significant challenges in their efforts to acquire water. These issues include environmental concerns, increasing costs to transport water from outside the region, groundwater contamination, and compliance with Federal and State mandates regarding water quality.

Given the challenges associated with imported water and groundwater, it is imperative that local government look to reclaimed water as a means of addressing supply issues.

I, THEREFORE, MOVE that the Board of Supervisors direct the Chief Executive Office and the Director of Public Works to:

- Analyze the steps required to double the usage of reclaimed water for non-drinking purposes;
- Solicit input from the General Manager of the Sanitation Districts concerning the usage of reclaimed water; and
- Report back to the Board of Supervisors in two weeks.
